## TECH NEWS

### Oculus Rift:

In 2015, a consumer version of a virtual reality head mounted display is due to arrive. This technology could change gaming, movies and learning as we know them.

## TIPS AND TRICKS

### Easy Studio

Click on the link below to learn how to use a great app called Easy Studio. Your child will have access to this if they are in Foundation to Grade 2:

## ICT AND ME

By Mr. McEachern

I really love using Explain Everything on the iPad. It allows you to create a screencast of anything you can think of. For example, if I had a student that had handed their work in to me. I could take a photo of it and then create a video giving feedback on their work. I could then give the video to the student so they could learn what they did well and what needs to be improved next time.
